I am in receipt of your letter regarding the engineering studies that are underway on the roadways adjacent to your headquarters at Langley.

Due to the different factors that have to be considered and analyzed in an environmental assessment, a minimum of four to six months will be required to assess this project. This work will start as soon as the viable alternatives have been adopted.

The 120 day time limit in the Dewberry and Davis contract is the time they have to do the engineering study. Additional time beyond this is required for Department review, however this should be minimal.

Draft Technical Report #2 is slated for delivery by the consultant on January 9. Staff has already been advised to review this report as quickly as possible so the final report can be turned over to you for the next Traffic Advisory Committee meeting.

Very truly yours,

H. M. Shaver, Jr.
State Location and
Design Engineer
